

Desenvolvendo RESTful APIs com Ruby on Rails

Jackson Pires

AMS e Links (HATEOAS)

links (HATEOAS)

<http://jsonapi.org/format/#document-links>

links (HATEOAS)

```
link(:self) { contact_path(object.id) }
```

```
link(:kinds) { kind_path(object.id) }
```

links (HATEOAS)

```
link(:self) { contact_url(object.id) }
```

```
link(:kinds) { kind_url(object.id) }
```

development.rb

```
Rails.application.routes.default_url_options = {  
  host: 'localhost',  
  port: 3000  
}
```

relationships

<http://jsonapi.org/format/#document-resource-object-relationships>

relationships

```
belongs_to :kind do
```

```
  link(:related) { kind_url(object.kind.id) }
```

```
end
```
